

Noverwhelmy – Task Manager

This project will involve a web-based task manager. Users will be able to view, add, edit, and delete tasks.

What types of items will your application work with?

Tasks/to-do list items such as:

- Go grocery shopping
- Meal prep

What fields/types will your application items have?

- Task id (integer)
 - E.g. 1
- Description (string)
 - E.g. Fold laundry
- Deadline (string)
 - E.g. 06-04-2025
- Completed (bool)
 - E.g. F = not completed

What validation will occur on the edit page of your application? i.e. what validation rules will be applied? Reminder that at least 3 validation rules are required.

1. Deadline must match the DD-MM-YYYY format
2. Deadline must be current or future date
3. Description must be between 4 and 200 characters

What validation messages will be presented if validation fails in the above cases?

1. “Please enter the date in DD-MM-YYYY format”
2. “Deadline must be a current or future date”
3. “Please enter between 4 and 200 characters in the description”
